

## BLUES REVISITED 01..... but in which key?

The **Magic Chords** will play 80% of songs. Remember the **Circle of Fifths**? Pick a **KEY** in the outer circle, which gives your root/**TONIC** note and your root major chord (Roman Numeral **I**/**FIRST POSITION**).

**CLOCKWISE**  gives you the **DOMINANT** chord (Roman **V** / **FIFTH POSITION**) for that key.  
**ANTICLOCKWISE**  gives the **SUBDOMINANT** chord (Roman **IV** / **FOURTH POSITION**).

The **INNER** circle shows the **RELATIVE MINOR** chord for that key (Roman **vi** / **SIXTH POSITION**, which is a minor chord – See Movable Chords 104, Scale Degrees).

## 12 Bar Blues
